

## Drip Menu

### **SIMPLY HYDRATE**

IV therapy instantly replaces electrolytes, hydrates the body, and improves over-all function and well-being. Our body's brain and organs function at a higher rate when hydrated.

### **MYERS COCKTAIL**

The Myers Cocktail is a widely renowned infusion and is the vitamin cocktail that started it all! Just the right mix of vitamins and minerals for overall wellness. It helps with fatigue, migraines, depression, muscle pain, menstrual cramps and much more.

### **ENERGY**

A boost of energy from extra B12, B5 and B6 to get you through the week. Feel better doing day-to-day activities without that worn out feeling.

### **IMMUNITY**

The Immunity Drip is a mega dose of immune boosting agents. It contains high doses of Vitamin C combined with B vitamins and nutrients to help combat super bugs and common viruses.

### **DETOX**

Glutathione is thought to be one of nature's most powerful antioxidants. Think of it like a little magnet that goes through the body and attracts the toxins and heavy metals like lead and mercury and draws them out.

### **HANGOVER**

If you have overindulged, this drip will have you back on track. This drip is rich in rehydrating fluids, vitamins, and anti-nausea meds that will provide fast relief and get you feeling like yourself again.

### **PRE/POST SURGERY**

This drip is ideal if you are undergoing any type of surgery. It contains multiple high dose vitamins and antioxidants, which allows for faster healing time and restores the essential nutrients that are lost after undergoing surgery.

### **WEIGHT LOSS AND METABOLISM BOOSTER**

Balances insulin and detoxifies the liver therefore bringing back proper metabolism and insulin controls for fat loss.

### **BEAUTY**

A blend of amino acids that help to prevent skin problems and deterioration. It stimulates cell turnover, skin radiance, healing wounds and promotes collagen growth.

### **THE GOLD MEDAL**

An athlete's secret weapon! The perfect blend of B vitamins, electrolytes, antioxidants and amino acids that help the body perform its best as a pre-endurance prep or a post-recovery plan.
